-  Banjara Hills, Hyderabad

SKILLS

Languages: Java, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring Boot, React.js

Databases: MySQL

Other Skills: RESTful APIs, JWT, ORM (Sequelize)

EDUCATION

- B.Tech**
- KG Reddy College of Engineering & Technology**
- Branch:** Computer Science Engineering
- CGPA:** 6.69
- August 2020 - June 2023
- Diploma**
- Bandari Srinivas Institute of Technology**
- Branch:** Computer Science Engineering
- Percentage:** 70%
- June 2017 - July 2020

CERTIFICATION

Full Stack Developer - ExcelR Solutions

LANGUAGES

- English
- Telugu
- Hindi

PROFILE

Aspiring full stack developer with hands-on experience in developing web applications using Java, Spring Boot, React.js, Express.js, and MySQL. Seeking to leverage my skills in software development and contribute to a dynamic team in a challenging work environment.

PROJECTS

Library Management Web Application

- Student and Book Management:** Designed and integrated comprehensive forms and data tables for efficient management of student records, book inventories, and borrowing transactions, enhancing data organization and retrieval.
- Backend Services:** Developed backend services using Express.js and Sequelize ORM, facilitating efficient CRUD operations with MySQL. Optimized server performance and ensured reliable data handling.
- Frontend Development:** Engineered dynamic and responsive user interfaces using React.js, delivering an intuitive and seamless user experience across various devices and screen sizes.
- Data Validation and Error Handling:** Established robust data validation and error handling mechanisms on both frontend and backend, ensuring data integrity and providing a resilient and user-friendly application experience.

E-commerce Website

- User Authentication and Authorization:** Implemented secure login mechanisms with role-based access control utilizing JSON Web Tokens (JWT), ensuring robust protection of user data and secure access to application features.
- Frontend Development:** Developed a responsive and dynamic user interface using React.js, incorporating essential features such as product listings, shopping cart functionality, and user authentication, resulting in an engaging and interactive user experience.
- Backend Services:** Designed and implemented a RESTful API using Express.js and Spring Boot for managing product data, user authentication, and order processing, ensuring reliable and scalable backend functionality.
- Database Management:** Utilized MySQL for managing user data, product details, and order history, ensuring efficient and reliable database interactions.
- Security:** Applied JWT-based authentication to safeguard user sessions and ensure secure transactions, enhancing overall application security and user trust.
- Payment Gateway Integration:** Integrated Razorpay for secure and seamless payment processing, facilitating smooth and reliable transaction handling within the application.

INTERNSHIP EXPERIENCE

Software Development Intern

- Ai Variant June 2024 - August 2024
- Developed and maintained RESTful APIs using Spring Boot to support customer-facing applications, ensuring efficient data handling and integration with front-end components.
 - Contributed to front-end development with React.js, focusing on creating a responsive design and enhancing the overall user experience across different devices.
